### First Quarter 2012 Results

**Total net revenues** were RMB106.7 million (\$16.9 million) for the first quarter of 2012, up 22.1% from the first quarter of 2011, primarily due to the rise in patient cases from existing centers and the increase in number of centers in operation compared with first quarter of 2011.

**Cost of revenues** in the first quarter of 2012 was RMB44.4 million (\$7.1 million), a 35.8% increase from the first quarter of 2011, primarily due to an increase in depreciation costs related to new equipment as well as rising consumable and other center-related expenses.

**Gross profit margin** in the first quarter of 2012 was 58.4% as compared to 62.6% in the first quarter of 2011. The lower gross profit margin was primarily due to an increase in depreciation cost as a result of business expansion, and opening of new centers.

**Operating expenses**, consisting of selling expenses and general and administrative expenses, were RMB24.9 million (\$4.0 million) in the first quarter of 2012 as compared to RMB19.9 million in the first quarter of 2011. The operating expenses are composed of RMB8.0 million (\$1.3 million) in selling expenses and RMB16.9 million (\$2.7 million) in G&A expenses, accounting for 7.5% and 15.9% of net revenues respectively. The increase was primarily due to rising promotional and marketing expenses relating to new centers established in the past 12 months. The company also spent RMB2.5 million (\$0.4 million) in web-based marketing expenses in this quarter.

**Operating income** was RMB37.3 million (\$5.9 million) in the first quarter of 2012, a 7.5% increase from the first quarter of 2011. **Operating income excluding share-based compensation expenses** (non-GAAP) was RMB39.6 million (\$6.3 million), a 6.7% increase from the first quarter of 2011.

**Net income** in the first quarter of 2012 was RMB25.0 million (\$4.0 million), a 9.2% increase from the first quarter of 2011. Both **basic** and **diluted earnings per ADS** for the first quarter of 2012 were RMB0.52 (\$0.08).

**Adjusted EBITDA** (non-GAAP) was RMB73.6 million (\$11.7 million) for the first quarter of 2012, representing a 12.1% increase from the first quarter of 2011, primarily due to increase in operating income and depreciation expenses during the period.

As of March 31, 2012, the Company had **total fixed assets** of RMB1,051.1 million (\$166.9 million), **cash** of RMB281.7 million (\$44.7 million), and **restricted cash** of RMB11.8 million (\$1.9 million).

### **Safe Harbor Statement**

This press release contains forward-looking statements. These statements constitute “forward-looking” statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and as defined in the U.S. Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified by terminology such as “anticipate,” “believe,” “estimate,” “expect,” “forecast,” “intend,” “may,” “plan,” “project,” “predict,” “should” and “will” and similar expressions. In particular, many of the statements from management in this press release and the section under “Outlook for Full Year 2012” are forward-looking in nature. These forward looking statements are based upon management’s current views and expectations with respect to future events and are not a guarantee of future performance. Furthermore, these statements are, by their nature, subject to a number of risks and uncertainties that could cause actual performance and results to differ materially from those discussed in the forward-looking statements as a result of a number of factors. Such factors include: the number of new radiotherapy and diagnostic imaging centers opened; the increase in the number of patients in existing centers; the establishment of specialty cancer hospitals; changes in the healthcare industry in China, including changes in the healthcare policies and regulations of the PRC government; and technological or therapeutic changes affecting the field of cancer treatment and diagnostic imaging. Further information regarding these and other risks is included in the Company’s filings with the U.S. Securities and Exchange Commission at [www.sec.gov](http://www.sec.gov). The Company does not undertake any obligation to update any forward-looking statement, except as required under applicable law.

## **About Non-GAAP Financial Measures**

To supplement the consolidated financial statements presented in accordance with United States Generally Accepted Accounting Principles (GAAP), Concord Medical uses certain non-GAAP measures. The Company presents certain of its financial information that is adjusted from results based on GAAP to exclude the impact of share-based compensation expense. The Company believes excluding share-based compensation expense from its non-GAAP financial measures is useful for its management and investors to assess and analyze the Company's core operating results as such expense is not directly attributable to the underlying performance of the Company's business operations and do not impact its cash earnings. Concord Medical also believes these non-GAAP measures excluding share-based compensation expense are important in helping investors to understand the Company's current financial performance and future prospects and to compare business trends among different reporting periods on a consistent basis. In addition, Concord Medical also presents the non-GAAP measure of Adjusted EBITDA, which is defined in this announcement as net income plus interest, taxes, depreciation and amortization, share-based compensation expenses and other adjustments. Other adjustments include foreign exchange losses and other income, and loss from disposal of property, plant and equipment. Furthermore, Adjusted EBITDA eliminates the impact of items that the Company does not consider indicative of the performance of its network of centers. The Company believes investors will similarly use Adjusted EBITDA as one of the key metrics to evaluate its financial performance and to compare its current operating results with corresponding historical periods and with other companies in the healthcare services industry. The presentation of these additional measures should not be considered a substitute for or superior to GAAP results or as being comparable to results reported or forecasted by other companies. The non-GAAP measures have been reconciled to GAAP measures in the attached financial statements.
