Dr. Jianyu Yang, Chairman and Chief Executive Officer of Concord Medical, commented, "With the smooth construction of the Company's hospitals, the corresponding costs have increased and have had an impact on the Company's financial results. However, the year 2018-2019 was an important stage for the Company's business development. In 2018, the Company received financing from strategic investors. 2019 First Half Financial Results

Network Business

Net revenues from the network business were RMB68.0 million (\$9.9 million), representing a 14.4% decrease from net revenues of RMB79.4 million in the first half of 2018, primarily attributable to the closure of certain centers in our network of centers. With one center closed in the first half of 2019, the Company operated a network of 30 centers in 20 cities in China as of June 30, 2019.

Cost of revenue of the network business was RMB34.8 million (\$5.1 million), representing a 18.9% decrease from RMB42.9 million in the first half of 2018.

Gross profit from the network business was RMB33.2 million (\$4.8 million), representing a 9.0% decrease from RMB36.5 million in the first half of 2018. The gross profit margin for the first half of 2019 was 48.8%, compared to 46.0% for the same period last year.

Selling expenses of the network business were RMB9.3 million (\$1.4 million), representing a 6.1% decrease from RMB9.9 million in the first half of 2018. Selling expenses as a percentage of net revenues was 13.7% in the first half of 2019, compared to 12.5% in the first half of 2018. The decrease in selling expenses of the network business was mainly due to reduced marketing, conference, office and travel expenses.

General and administrative expenses of the network business were RMB82.5 million (\$12.1 million), representing a 0.3% increase from RMB82.6 million in the first half of 2018. General and administrative expenses as a percentage of net revenues were 121.9% in the first half of 2019, compared to 104.0% in the same period last year. The increases were mainly due to the counsel fee and travel expense related to the closure of certain centers.

Comparing to RMB4.8 million in the same period last year, capital expenditures increased to RMB24.8 million (\$3.6 million) in the first half of 2019 primarily for procuring equipment for network centers.

Accounts receivable were RMB85.0 million (\$12.4 million) as of June 30, 2019, compared to RMB82.0 million as of December 31, 2018. The average period of sales outstanding for accounts receivable (also known as "Days Sales Outstanding") was 221 days in the first half of 2019.

During the first half of 2019, the Company handled 5,334 patient treatment cases and 74,721 patient diagnostic cases, representing a 0.4% decrease and a 5.9% increase from the same period last year, respectively. The increase in patient diagnostic cases was mainly due to the counting of the cases from a center which entered into network contract with the Company in December 2018.

Hospital Business

Net revenues from the hospital business were RMB31.5 million (\$4.6 million) in the first half of 2019, representing a 22.6% increase from net revenues of RMB25.7 million in the first half of 2018, mainly due to the consolidation of Shanghai Meizhong Jiahe Cancer Center Co., Ltd. in the fourth quarter of 2018.

Cost of service of the hospital business in the first half of 2019 was RMB61.6 million (\$9.0 million), a 60.8% increase from cost of service of RMB38.3 million in the first half of 2018, mainly because of the consolidation of Shanghai Meizhong Jiahe Cancer Center Co., Ltd. in the fourth quarter of 2018.

Gross loss from the hospital business was RMB30.1 million (\$4.4 million) in the first half of 2019, compared to RMB12.6 million in same period last year.

Selling expenses of the hospital business were RMB1.5 million (\$0.2 million) in the first half of 2019, representing a 114.3% increase from selling expenses of RMB0.7 million in the first half of 2018. The increase was mainly due to the consolidation of Shanghai Meizhong Jiahe Cancer Center Co., Ltd. in the fourth quarter of 2018.

General and administrative expenses of the hospital business were RMB57.0 million (\$8.3 million) in the first half of 2019, of which employee benefit expenses were RMB19.9 million (\$2.9 million). In the same period of last year, general and administrative expenses of the hospital business were RMB31.8 million. The increase was mainly due to the increase in salary and consultation fees for hospitals.

Comparing to RMB282.1 million in the first half of 2018, capital expenditures of the hospital were RMB410.5 million (\$59.8 million) in the first half of 2019, which was mainly related to the construction fees and medical equipment payment for Beijing Proton Medical Center, Shanghai Concord Cancer Center and Guangzhou Concord Cancer Center.

As of June 30, 2019, accounts receivable from hospital business were RMB10.9 million (\$1.6 million), a 55.7% increase from accounts receivable of RMB7.0 million as of December 31, 2018. The number of Days Sales Outstanding was 51 days in the first half of 2019.

As of June 30, 2019, the Company had bank loan totaling RMB1.1 billion (\$163.0 million).

About Non-GAAP Financial Measures

To supplement the consolidated financial statements presented in accordance with United States Generally Accepted Accounting Principles ("GAAP"), Concord Medical uses certain non-GAAP measures. The Company presents certain of its financial information that is adjusted from results based on GAAP to exclude the impact of share-based compensation expense. The Company believes excluding share-based compensation expense from its GAAP financial measures is useful for its management and investors to assess and analyze the Company's core operating results, as such expense is not directly attributable to the underlying performance of the Company's business operations and do not impact its current cash earnings. Concord Medical also believes these non-GAAP measures excluding share-based compensation expense are important in helping investors to understand the Company's current financial performance and future prospects and to compare business trends among different reporting periods on a consistent basis. In addition, Concord Medical also presents the non-GAAP measure of Adjusted EBITDA, which is defined in this announcement as net income plus interest, taxes, depreciation and amortization, and sharebased compensation expenses and other adjustments. Other adjustments include foreign exchange gain, loss on disposal of long-lived assets and other income. Furthermore, Adjusted EBITDA eliminates the impact of items that the Company does not consider to be indicative of the performance of the network business and hospital business. The Company believes investors will similarly use Adjusted EBITDA as one of the key metrics to evaluate its financial performance and to compare its current operating results with corresponding historical periods and with other companies in the healthcare services industry. The presentation of these additional measures should not be considered a substitute for or superior to GAAP results or as being comparable to results reported or forecasted by other companies.
